# Welcome

Since the start of Rite-Fix Ltd in April 2009 our aim has been to serve the Construction Industry with a first class personal service to All Our Customers and create an excellent working relationship.

As a Major stockist to some of the largest names in Construction products we are able to give availability to large stocks of all products for every day aspects of the Construction industry.

As a family run business we offer a friendly service both on and off site or why not visit our trade counter in Olton South Birmingham. Our Location gives us excellent geographic position to service anywhere in the UK, same/next day Free of charge.

The New Rite-Fix Ltd Catalogue is a guide through a product range which means more to our customers and business than just Fixings, Fasteners and Power Tools. It also reflects our commitments and responsibility to quality, reliability and service.

In the following pages you will find comprehensive range of products and technical information clearly categorised and coded to assist you in the selections of items for your particular requirements and working environment. Whatever range you choose from you can be reassured that you will receive a quality product, superior in performance and reliability.

Our company offers helpful advice, technical support and an on-site back up service that includes training and testing when required.

Please take a few moments to read through the catalogue and familiarise yourself with our product range. Should you require further guidance or information on your individual requirements, please do not hesitate to contact us at anytime.

Yours Sincerely,

### Technical Information

#### Guidance

Kilograms and Pounds are the terms used to express a measure of weight.

Newton's, Decanewtons, Kilonewtons are the terms used to express a measure of force.

When publishing the performance of anchors we normally refer to Newtons and Kilonewtons, however it is possible to relate these back to Kilograms and Pounds by the simple conversion table below.

Newton's (N)	Decanewtons (daN)	Kilonewtons (kN)	Kilograms (kg)	Pounds (lbs)
1	0.1	0.001	0.1	0.22
10	1	0.01	1	2.2
100	10	0.1	10	22
500	50	0.5	50	110
1000	100	1	100	220
1500	150	1.5	150	330
2000	200	2	200	440
5000	500	5	500	1100
7500	750	7.5	750	1650
10000	1000	10	1000	2200

#### Performance Information

In this catalogue we have quoted performance figures for some anchors, where they are stated as recommended loads, these are in accordance with Eurocode standards. C20/25 Concrete is the equivalent of 30 N/mm<sup>2</sup>.

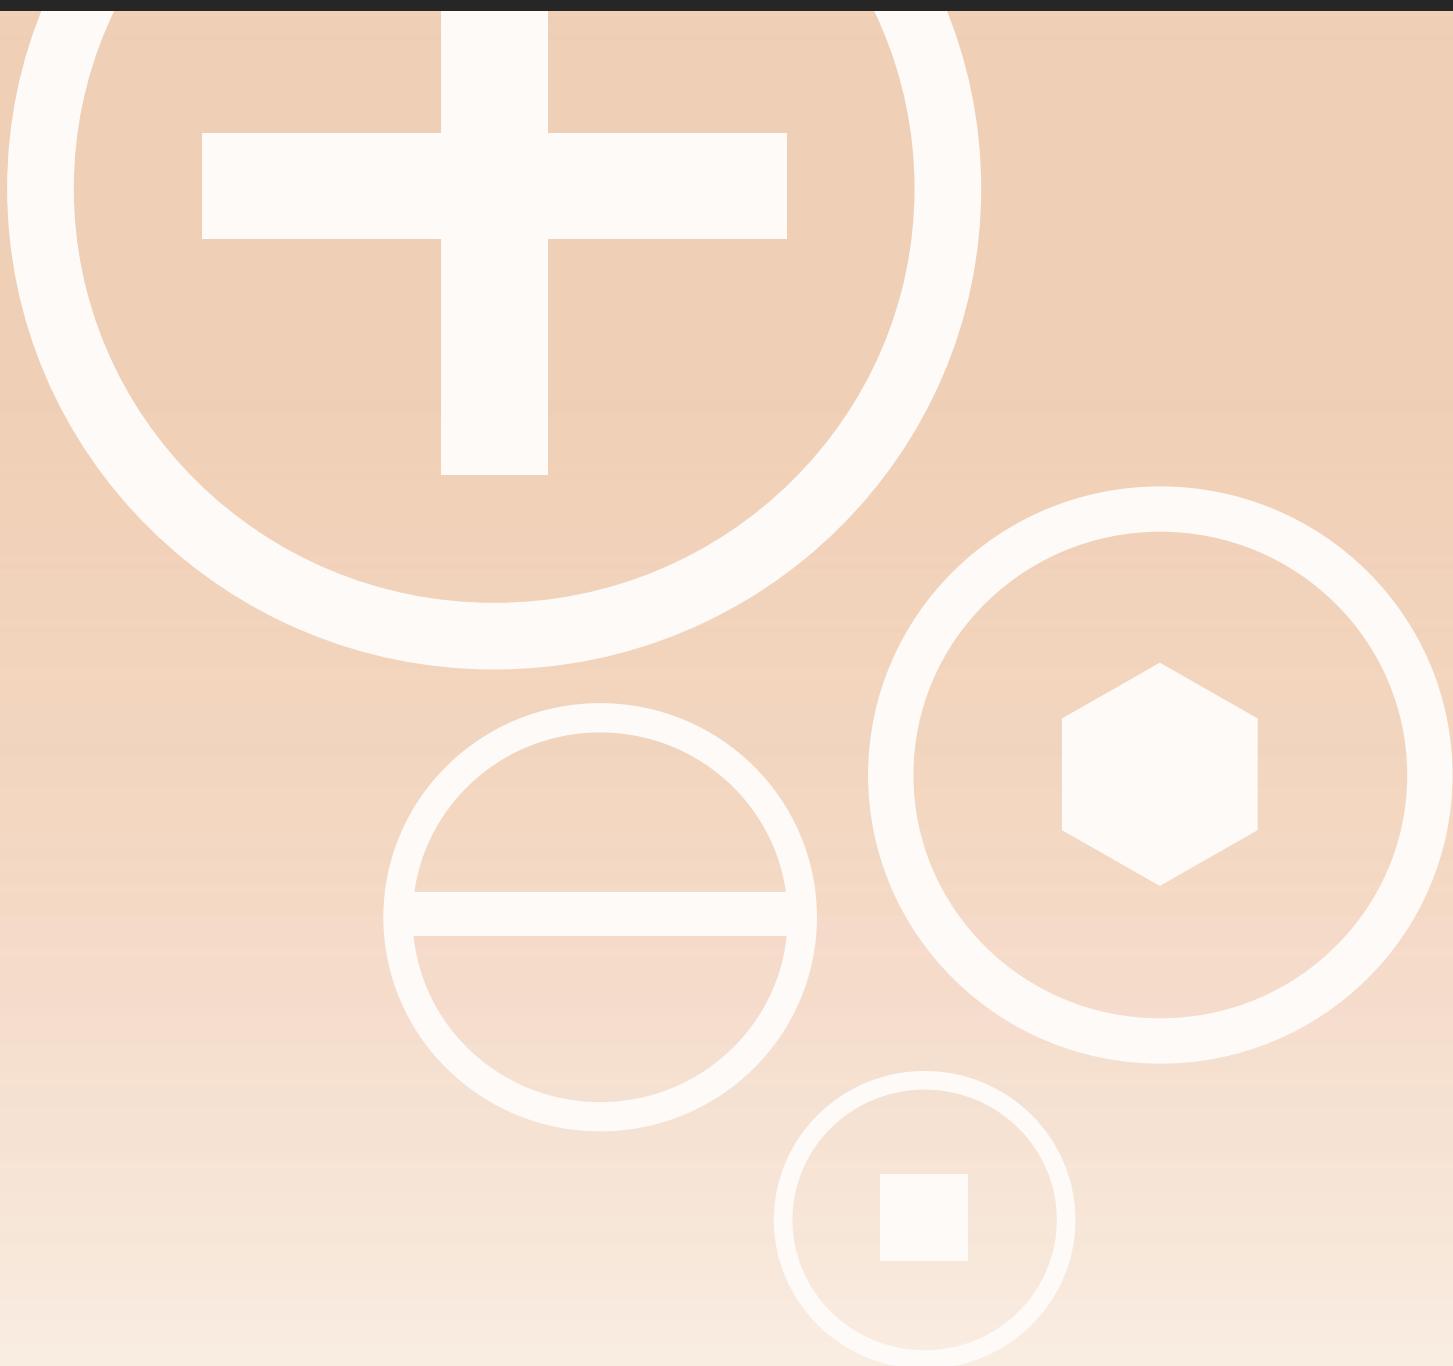

#### Technical Service

For detailed advice on specific anchors or applications please contact our sales department . Site appraisal and insitutests are also available free of charge.
